PROFESSIONAL SUMMARY

Cybersecurity Engineer / IT Auditor working large enterprises (BPCE, EY) on risk management, vulnerability remediation, and security governance. Passionate about information systems security. I leverage adaptability, curiosity, and strong technical skills to address cybersecurity challenges. Skilled in incident analysis, automation, solution deployment, and collaborative work, I aim to contribute to strengthening your company's security posture.

EDUCATION

Ecole Supérieure Informatique Electronique Automatique (ESIEA) (Engineering school)	Paris, France
Engineering degree	Sep 2017 – Dec 2023
• Specialization in Cybersecurity • Focus on Security and Risk Management, Asset Security, Security Operation and Audit IT. • Academic Projects & Activities (Passwords Projects, DEFNET, Server Chat...)	

WORK EXPERIENCES

IT Auditor Junior – IT Consultant Junior	La Défense, France
EY	2023 - 2024

- Analyzed IT risks on 15+ applications (access, operations, security).
- Performed 30+ ITGC tests (access management, change management, security) across banking and insurance clients.
- Participated in 10+ stakeholder interviews with IT, security, and operations teams to validate control design and effectiveness.
- Writing of deliverables and recommendations to strengthen the maturity of cybersecurity systems.
- Contributed to financial & operational data analysis and IT systems evaluations.
- Executed log analysis and activity traceability checks (privileged access, sensitive operations).
- Used advanced Excel (lookups, pivot tables) and internal audit tools to streamline data testing and achieve ~30% efficiency gains.
- Presented findings to seniors/managers and helped define remediation plans addressing identified IT risks.

Cybersecurity Engineer – Consultant Cyber Risk & Security Intern	Paris, France
Headmind Partners (BPCE S.A)	Apr 2023 – Sept 2023

- Coordinated the monthly cybersecurity committee gathering 15+ CISOs and monitored action plans.
- Authored and published weekly articles on cyber threat monitoring. (development of 20 publications).
- Developed a vulnerability management API (Python, KPIs, Power BI dashboard) to improve security governance.
- Built dashboards (Excel / Power BI) to visualize risk levels, remediation progress.
- Conducted verification and tracking of vulnerabilities (Phishing, Ransomware, DoS, SQL Injection, XSS...).
- Drafted policy and procedure updates (access management, backup policies, change management) to align with industry standards.
- Collaborated with IT and security teams to track remediation progress and ensure closure of identified risks within deadlines.

Network Security Engineer Intern	Paris, France
Groupe BPCE (BPCE Infogérance & Technologies)	Mar 2022 – Aug 2022

- Deployed a REST API on AWS (Python, SQL) to collect and analyze critical network security information on more 200 resources (VPC, Security Groups, subnets), reducing manual reporting time by 40%.
- Produced technical documentation and delivered presentations in English for international stakeholders.
- Exploration of different cloud providers (GCP, AWS, Azure)
- Discovery and implementation of Terraform for cloud infrastructure deployment automation

Vice-President, Head event at School Club	Paris, France
ESIEA Student club, Paris	2018 – 2022

- Directed a 30-person team, serving as the key liaison for the Direction school.
- Administered and optimized the annual budget;
- Spearheaded the development of integrated communication and financial plans for all events.
- Organization of major events (parties, ceremonies, student integration weekends, Gala) attracting up to 800 participants.
- Coordination with suppliers, contract negotiation, and partner relationship management.
- Adherence to and optimization of annual budget; development of communication, financial plans for each event.

IT PROJECTS

Personal Budget Tracker (Excel) - Personal Project

Interactive Excel tool to automate expense tracking and optimize personal financial management in a manual and automatic way

Clubs & Tickets (Python) – Personal Project
--

Web scraping script in Python that automates the search and retrieval of free tickets online from sites.

Professional Portfolio (JS/CSS) – Personal Project

Digital portfolio structuring 10+ IT/Audit/Cybersecurity projects and experiences, serving as an interactive CV and professional enhancement tool.

Multi-User Server Chat (Java) - ESIEA Paris Project
--

Multi-user chat server in Java, handling public rooms and private messages with client connection management.

SKILLS, INTERESTS & CERTIFICATIONS

Technologies: AWS, Terraform, Networks Protocols, Firewalls, SIEM, Rest API, Linux, OpenAI, SQL Alchemy, MongoDB
Programming Languages: Python, Java, SQL, PL/SQL, C, JavaScript, HTML, CSS, PHP, React.js, Batch
Tools & Platforms: Microsoft Office Suite, Excel, Power BI, Splunk, Git, Wireshark, Jira, ServiceNow, Dashboards for KPI
Soft Skills: Adaptability, Communication, Curious, Teamwork, Problem-solving, Autonomy, Agile, Rigorous, Leadership, Initiative
Languages: English (Fluent), French (Native), Spanish (Intermediate)
Certifications: Google Cybersecurity Professional Certificate, Google Project Management Certificate, IBM Skills (Cybersecurity, Python for Data)
